### **What's a legacy system?**

Basically, a legacy system is your "old" system: for example, the first EHR you started with five years ago that your organization has now outgrown. It doesn't have to be software: a legacy system can be an old method, tool, or way of doing business.

### **Is a legacy system harming your business?**

If you're clinging to an outdated system, whether paper or electronic, that isn't able to provide what you require - and/or is hampering for your workflow - it may be costing you much more than just its price tag.

Working around a clunky, inefficient legacy system not only wastes time, money and energy; this lack of streamlining may be causing you to miss out on significant profits and growth.

### **Is It Time to Switch?**

### **ICD-10 Webinar Series**

PIMSY EHR is excited to host an ICD-10 webinar series, presented by Dr. Jason King - which will run through the summer in preparation for the 10/1 deadline.

### **Too many kudos to keep track of!**

I recently had to create a spreadsheet in order to keep track of all of the PIMSY testimonials we receive from satisfied clients! See the feedback for yourself:
