Secure Direct Email offers data encryption

What is direct email?

Direct email (or secure encrypted messaging) is a protocol for protected data sharing, ensuring that the PHI (protected health information) you exchange with your clients and colleagues is and remains safe, secure, and HIPAA-compliant.

Does it meet Meaningful Use requirements?

Yes, the PIMSY secure email option meets the direct method requirement of Meaningful Use Stage 2 Core Measures: 15 (Summary of Care), 7 (Patient Electronic Access), and 17 (Use Secure Electronic Messaging).

How does it work?

Direct email allows you to send anything you choose to your clients: mood surveys, depression tests, lab results, session notes, clinical summaries, etc – in a secure format. It also allows you to send any information you want to other providers, such as clinical summaries, as long as they have a direct email address.

Previously, HIPAA limitations and data security concerns made exchanging this type of PHI risky and prohibitive. Recognizing these concerns, legislative bodies have come together to provide an electronic solution for an increasingly digital world. [Click here to read more....](#)

How can we help you?

How can PIMSY minimize expenses, increase revenue, save time - and enhance your practice? Schedule a no-commitment demo and find out!

In a one hour live Web demo, we can show you how PIMSY can help - and answer any questions you might have. [Click here to schedule.](#)
