

## Fresh Functionality

Happy New Year! In December, we released another PIMSY update, meaning that we provided our customers with a ton of cool new features, totally free.

One of the things that sets PIMSY apart from other systems is that we routinely perform complimentary product updates, based *directly* on our clients' requests.

They tell us what they'd like to see in their mental health EHR, and we make it happen. We have yet to encounter another product - or Team - that is as [responsive to customer feedback](#) as PIMSY. It's simply unheard of in the industry.

Even beyond PIMSY itself, we're also constantly improving our hardware and hosting capabilities: we recently made some changes with Microsoft Azure so that PIMSY runs even faster.

We don't just keep adding new stuff; we continually "de-frag" the existing software + hardware to make sure our powerful product stays as nimble as possible!

## On the Horizon

In addition to all of the powerful enhancements we just added, here's a taste of what's coming in 2017:

- > **PIMSY Lifeline**
- > **Strategic Partnerships**
- > **mental health EHR enhancements**

and much more: [click here for details...](#)

## You Get What You Pay For

We continue encountering practices who have tried to utilize a free EHR - only to find out that 1) it's not designed for mental / behavioral health; 2) it doesn't do what they need; 3) it doesn't grow with them; 4) it's not inexpensive!

See how [free can actually cost you.](#)

**To your success!**

**Leigh-Ann Renz**
