

## Revenue Cycle Management for Human Services

*By combining powerful software tools, more than a decade of industry experience, and lots of just plain hard work we bring rapid improvement to your bottom line.*

### **Data Flow + Work Flow = Cash Flow**

The success of any business venture depends upon being able to maintain a consistent flow of cash to meet operational demands. Ideally, this process happens smoothly and quickly so that the majority of effort needed to run the business can be focused on meeting its core mission. When billing and collections activities become overly burdensome, or worse yet ineffective, the entire organization suffers.

Aym Technologies has spent the last decade serving the human services industry. We have made it our goal to provide the systems and people required to ensure that you spend your precious time helping others, instead of chasing dollars.

Contact us today to learn how Revenue Cycle Management from Aym can help your business.

*An innovative, fully integrated platform focused toward helping providers gain control of their revenue cycle.*

### **Features and Modules:**

- Full client funding and demographics configuration.
- Extensive service code and payer configuration.
- Electronic billing—Professional and Institutional.
- Extensive AR module w/automated remittance posting and rebilling capability.
- Enter data at any point in the revenue stream—Scheduling, clinical notes, manual time entry, or even imports from other systems.

### **Service Advantages:**

- Choose from a full suite of service options. Mix and match the services that best meet your needs.
- Fully Managed “white glove” service option—make us your full time finance team!
- Top notch support and account management team stays with you till we get you the results you need.
- Unmatched industry expertise—We were human service providers BEFORE we created this program, so our staff knows how to get your claims paid
- Experienced consulting team available to refine internal processes to ensure lasting improvements.
