Which codes are you supposed to use?? And when!?

DSM-5, ICD-10, CPT - how do you make sense of it all?!

We continue to receive inquiries from both clients and leads about coding & billing: how DSM interacts with ICD; what the hard deadlines are for these diagnosis codes; and fighting with payers about the updated CPT codes.

Mental and behavioral health care practices have an added challenge of DSM codes, in addition to the already confusing world of medical coding & billing. How do you know what codes to use - and when??

MEANINGFUL USE MYTHS

"I've heard that CMS is delaying Meaningful Use and that the 7/1/14 deadline no longer applies"

The answer is yes AND no: there is a Proposed Rule on the table, that is open for public comment until 7/21/14, that would relax the requirements to meet Meaningful Use in 2014.

If it goes into effect, this rule would change the 7/1 deadline for first-time participants in the Medicare MU program.

PIMSY GIVES BACK: STAR RANCH

STAR was started in 2005 by Jim and Karen Owens, who opened their western North Carolina farm for horses and goats to have a safe place to heal until they can be adopted.

There just isn't enough room at the local animal shelter, and sometimes hooved animals require a little extra care. STAR Ranch is a place where they can receive that extra nurturing until a forever home is found. Check out some of the great work they do via their [adoption stories](#).
