Transition to ICD-10: What Does It Mean for You!?

There is now less than a year to prepare for the coding transition from ICD-9 to ICD-10. What exactly does this mean, and how does it affect you as a mental health provider?

The upcoming ICD-10 coding transition is both **massive and mandatory**: experts estimate that medical practices need to have 6 months cash reserves to get through it! Due to the scope of changes, **this isn't something that can be ignored or addressed at the last minute**. Researching and implementing a plan of action for 2014 is an essential investment of your time.

[Click here](#) to get details about the ICD-10 transition and how it affects your practice and [here](#) for a list of ICD-10 resources to start your action plan.

As always, [let us know](#) if you have any specific questions, and we'll check with our [Advisory Board](#) to get you an answer!

MENTAL HEALTH RESOURCES FOR VETERANS

In honor of Veterans Day, **we at PIMSY EHR would like to honor the sacrifice and dedication of servicemen/women and their families.**

We are all indebted to our nation's vets, whether they are our clients, friends or family members. It's no secret that service to our country, especially in a time of war, can cause PTSD, anxiety, substance abuse, and other mental health issues; with that in mind, **we've compiled a list of mental health resources for veterans:**

[VA Where to Get Help Guide](#)
[Wounded Warrior Project](#)
[NAMI Veterans & Military Programs](#)
[Free PTSD Treatment for Veterans](#)
[Veterans Crisis Line](#)
[SAMHSA Military Families](#)
