Testimonials

"Yup, even used [PIMSY] on my iPad during a meeting this week so I could get the basics in the note. I love having [remote access](#)."

Nicole Bebiak,
Owner/Therapist

"I can't think of any cons. Compared to the other medical records system I had to use previously, **PIMSY rocks!** I would recommend PIMSY to anyone wanting a user

Deadline Approaching

The Deadline for Meaningful Use is Drawing Near

In order to qualify for the full amount of available stimulus money, you have to be demonstrating meaningful use of an certified EMR by the end of 2011/January 1, 2012. [Click here](#) for more details on how much money is available over the years of the program and how it is distributed.

Haven't heard about the ONC-ACTB HITECH program? As part of the American Recovery and Reinvestment Act of 2009, the federal government is offering incentive funds for using a "certified" electronic medical records/electronic health records product. Third-party groups rigorously test and then certify programs to ensure compliance with the government's standards. By demonstrating "meaningful use" of a certified software, you can qualify for these funds. [Click here](#) to see what demonstrates meaningful use.

Medicaid eligible professionals can qualify for up to \$44,000 over 5 years, and [Medicare](#) eligible professionals can qualify for up to

friendly medical records system."

Jennifer Foltz,
Manager

Run PIMSY on your Mac!

Yes, it's true: **you can run PIMSY directly on your Mac without having to close and restart operating systems!**

Using [Parallels](#) software, seamlessly move between PIMSY (and other Windows-based programs) and your Mac applications.

Using Parallels, PIMSY doesn't look or act any differently than it does on Windows. We're very excited to be able to offer Mac users the ability to connect with our amazing Windows based program. As more offices have users on both Macs and PCs, software like Parallels can take the headache out of conflicting operating systems. [Click here](#) to learn more.

PIMSY on da map

Interested in using PIMSY for your office but concerned about meeting state and local requirements? Wonder if the PIMSY team has

\$63,750 over 6 years. Qualify for both Medicaid and Medicare? You must choose between the Medicare and Medicaid [EHR Incentive Programs](#) when you register. Not sure which program to pick? [Click here](#) for more info.

As you research, some great resources for information are the [EMR and HIPAA blog](#), the [US Dept of Health and Human Services' website](#) and [HiTechAnswers](#) (where providers, hospitals and non-profits can join for free to access information & to ask questions).

PIMSY Platinum 5.0 is ONC-ACTB Meaningful Use Certified and qualifies for the HITECH program. [Click here](#) to see more about PIMSY. [Contact us](#) to ensure that you [get started](#) on PIMSY Platinum 5.0 in time to reap the full incentive benefits. Let us show you how PIMSY Platinum 5.0 can qualify your practice for the CMS Incentives.

Happy Halloween!

PIMSY Team as Dirt Circus

Our illustrious premier PIMSY developer, Ian MacDonald, had a former life as a rock star in a band called Dirt Circus. For Halloween, some of our office staff decided to come in as Dirt Circus groupies, including Myles, our office mascot and in-house therapy dog.

What's Special About PIMSY?

PIMSY is the Best of Both Worlds

We are often asked why PIMSY is not Web Browser based. Developing PIMSY to be Browser based or desktop based was an important choice to make. We ultimately decided against the Web Browser option for several reasons:

User Interface: With PIMSY, you can have multiple windows open at the same time, which makes for fluid transfer between tasks. With a Browser, you lose this ease of use and workflow.

the experience to meet your specific requirements and needs?

The answer is "Yes!" We have PIMSY clients in 19 states and are well versed in making sure you continue to meet your requirements, regardless of where you are located. PIMSY is completely [HIPAA](#) compliant, on the Cloud and totally secure: we back up multiple times throughout the day in 3 different states and PIMSY has undergone rigorous security testing as part of ONC-ACTB certification.

Increased Security: Because you can't just open PIMSY through any Browser window, it adds a layer of security.

Browser Issues: PIMSY is not subject to the myriad issues that are part of using Browsers, including periodic updates that can negatively affect the user experience and attacks from outside sources.

PIMSY is the best of both worlds: desktop user interface with cloud-based security.

Ask Myles

Therapy Dog and PIMSY Office Mascot

There have been some exciting developments with Myles, our PIMSY office mascot and in-house therapy dog. [Myles of Smiles](#) is very close to being a registered 501 c3 non-profit organization, and PIMSY (SMIS) is now an official supporter of Myles of Smiles. As part of this exciting development, MOS also has a new logo (see below).

In addition to being a local celebrity, this Border Collie and his trainer, Kristin Walker (our new PVAR Channel Manager), provide encouragement for children with reading challenges through the *Puppy Tales* program at the local library. They also produce huge smiles at a local hospital with the mental health ward patients and staff, where Myles is referred to as "puppy prozac".

Last week, Myles was at Meadowbrook Elementary School to talk about *Puppy Tales*, the reading program. The kids **loved** him: [click here](#) to see pictures from the event. Myles and Kristin are also creating a children's book series about Myles and his adventures.

Want to learn more? Click [here](#) to follow Myles on Twitter; [here](#) to find him on Facebook or [here](#) to read his blog.

As always, we appreciate your feedback and your interest in PIMSY! Contact us to see how this incredible software can streamline your workflow and organize your office.

Sincerely,
Leigh-Ann Renz
