1. Automatically Populate Your Own Forms

PIMSY's Word Merge feature lets you automatically populate your own forms with data from the client's chart! This gives you the flexibility to **manage, fill out, and sign any document within the system** and is just one example of PIMSY's unprecedented customizable options and flexibility.

2. Everything in one efficient system

The whole point of PIMSY is to bring everything under one roof: scheduling/calendar, invoicing, remittance processing, HR/payroll, reporting, medication management, the entire client chart & medical record – **all of it in one efficient system**.

3. Affordable

PIMSY offers **Practice Management Suite EHR - at a small program price**. Not only does PIMSY more than pay for itself, it offers an incredibly high Return On Investment (ROI), especially when compared to the cost of comparable systems.

4. Group & Team Notes

PIMSY is one of the only mental health EHRs to offer both **group** and **team notes** in addition to assessment & progress notes.

5. Payroll & HR Functionality

PIMSY offers a **solid suite of HR tools to help manage your staff and practice, including Payroll**. PIMSY complies all of the system data and calculates complete payroll, including PTO. It even lets you review & approve payroll before it's finalized.

6. It's *Your* Data

Unlike many other programs, PIMSY doesn't hold your data hostage! We are confident enough in our product and services that, **should you ever decide to stop using PIMSY, we make it easy to retrieve your data**: click here for details.

7. Custom Care

The PIMSY Team provides a unique level of custom client care. Not only do we ensure that your pain points and needs are fully addressed, we guide you through a customized implementation and deployment plan, offering a tailored roll-out. After this initial set-up and training, **our Team offers unprecedented support: see user testimonials here**.

8. Leading the Compliance Pack

PIMSY offers the full list of ICD-10 codes for mental / behavioral health, psychiatry and substance usage. In addition to being fully HIPAA-compliant, safe, secure, and in the Microsoft Azure Cloud, PIMSY is also Meaningful Use 2014 Edition ("Stage 2") Certified. We are the only EHR / EMR we know of that offers a PQRS reporting tool, helping you track claims-based reporting via QDC codes – and we offer **mental health-specific compliance resources about ICD, HIPAA, MU, PQRS, and more**.

9. Created in the trenches, for mental & behavioral health

While many giant EHR corporations are seeing opportunity in mental health and churning out products to try and capture a share of the behavioral health market, that's not the same as coming at EHR from a provider's perspective. **PIMSY was built literally by and for mental / behavioral health and substance usage providers. We know our clients' first names**.

10. PIMSY grows with you

Many systems have a shelf life: they serve your requirements now, but you will have to repeat the difficult process of transitioning to a new program as your needs change. PIMSY offers three different tiers of functionality and price, which you can move among seamlessly as your organization evolves. **You won't outgrow PIMSY: it grows *with* your practice over time**.

PIMSY is a *solution*, not just a product!
