Are e-Prescribe and eMar the Same?

It's time to toss the paper and go digital. If you're navigating the EHR market and looking for features to fit to your needs, it's likely that Electronic Prescribing (e-Prescribe) and/or Electronic Medication Administration Record (eMar) might be some of the solutions you're after.

While they sound similar, e-Prescribe and eMar offer two different types of functionality that might be relevant to your practice. So what are they – and how do they differ?

e-Prescribe (eRx)

E-Prescribing allows physicians, medical practitioners and psychiatrists to electronically send prescriptions to a pharmacy instead of having to fax or call it in.

Connecting the point of care directly to the pharmacy improves communication and collaboration; decreases the risk of medical error or prescription fraud; minimizes the risk of drug-to-drug or drug allergy interaction; and improves medication adherence. [Learn More...](#)

eMAR

eMAR is a software solution that allows clinicians to electronically document medication administrations, vital signs and other observations. It can even display an alert with notes on when clinical actions or precautions need to be taken, enhancing patient safety.

It can assist with decision support, which is when a practice management system will automatically pop-up guidance when certain client data thresholds are met. For example, if you're entering data about your patient, the system can recognize a common course of treatment for that particular combination of diagnosis and vitals! [Learn More...](#)

**What to Know About Eating Disorders,
Substance Use and Trauma**

According to the National Association of Anorexia Nervosa and Associated Disorders (ANAD), as many as 24 million Americans are affected by eating disorders. Some health experts consider eating disorders to be a silent epidemic and have the highest mortality rate of any mental illness.

Sadly, only 1 in 10 people with an eating disorder receive treatment. A wide variety of biological and environmental variables contribute to the emergence of an eating disorder and aren't often treated alone, as they commonly co-occur with conditions such as depression, PTSD, trauma, anxiety and substance use. In this regard, there is no one size fits all treatment for eating disorders. [Learn More...](#)

How Can PIMSY Help You Grow?

“The Department of Mental Hygiene commented that PIMSY is one of the easiest + most effective EMR systems that they have ever encountered while performing mental health audits.” {Melissa H., Owner & LCSW-C}

To your success!
